PROFESSIONAL SUMMARY

Final-year Computer Science student who enjoys turning ideas into working software. I build full-stack web applications with React.js, Node.js, Express.js, and MongoDB, and I have also built an AI-powered document chatbot using Python, LangChain, and FAISS. I like solving problems, writing clean code, and picking up new tools quickly. Looking for a Software Developer role where I can contribute to real products and keep growing as an engineer.

TECHNICAL SKILLS

Languages: JavaScript, Python, C

Frontend: React.js, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control

Databases: MongoDB, MySQL

AI / LLM: Retrieval-Augmented Generation (RAG), LangChain, FAISS, OpenAI API

Data: Pandas, NumPy, Data Cleaning, Data Visualization

Tools: Git, GitHub, Postman, VS Code

Core CS: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems

PROJECTS

Student Service Portal GitHub Repo | Live Demo
React.js, Node.js, Express.js, MongoDB, JWT, Docker

- Built a MERN app with two roles (student and faculty/admin), each with its own login and access.
- Created 19 REST APIs with JWT login and bcrypt password hashing.
- Used 5 MongoDB collections, added assignment file uploads, and set up Docker.
- Added an offline mode with local storage so tasks and profiles still show when the server is down.

AI RAG Chatbot GitHub Repo | Live Demo
Python, LangChain, FAISS, Sentence Transformers, Groq API, Streamlit

- Built a chatbot where you upload a PDF and ask questions; it answers only from that PDF and shows the source text.
- Split the PDF into small chunks, converted them to embeddings, and stored them in FAISS to find the 3 best matches.
- Used Llama 3.3 70B (Groq API) with LangChain, and kept the prompt strict to reduce wrong answers. Deployed on Streamlit.

INTERNSHIP EXPERIENCE

Data Science Virtual Intern – XY Lofy AI **Jun 2026 – Jul 2026**

- Cleaned, explored, and analyzed 4–5 datasets using Python, Pandas, and NumPy to uncover patterns and trends.
- Applied data cleaning and visualization techniques to turn raw data into clear, usable insights.

EDUCATION

Bachelor of Technology in Computer Science and Engineering **2023 – 2027**
SR University, Warangal, India CGPA: 7.5 / 10

ACHIEVEMENTS

- Solved 150+ problems on LeetCode and HackerRank, strengthening data structures, algorithms, and problem-solving skills.
- Participated in the Google BIG CODE Challenge 2026.
- Part of a 6-member team in Smart India Hackathon (SIH), where I helped build a working project prototype.

CERTIFICATIONS

- Cisco – Data Analytics Essentials
- Cisco – Introduction to Cybersecurity
- Udemy – MySQL for Beginners (2025)
